

Children/Youth (0-17 yrs.) Treatment Settings: Home - Non-Medicaid Population by RSN.

Operational Definition: Percent of child/youth (0-17 yrs) mental health outpatient clients not on Medicaid who received services in the home in a Fiscal Year by RSN.

Operational Measure: Child/Youth (0-17 yrs) mental health outpatient clients not on Medicaid who received services in the home within the Fiscal Year divided by the total number of outpatient recipients not on Medicaid in the Fiscal Year.

Formulas:

Number of Child/Youth (0-17 yrs) mental health outpatient clients not on Medicaid who received services in the home in the Fiscal Year by RSN

Number of child/youth (0-17 yrs) not on Medicaid receiving community outpatient services in Fiscal Year by RSN

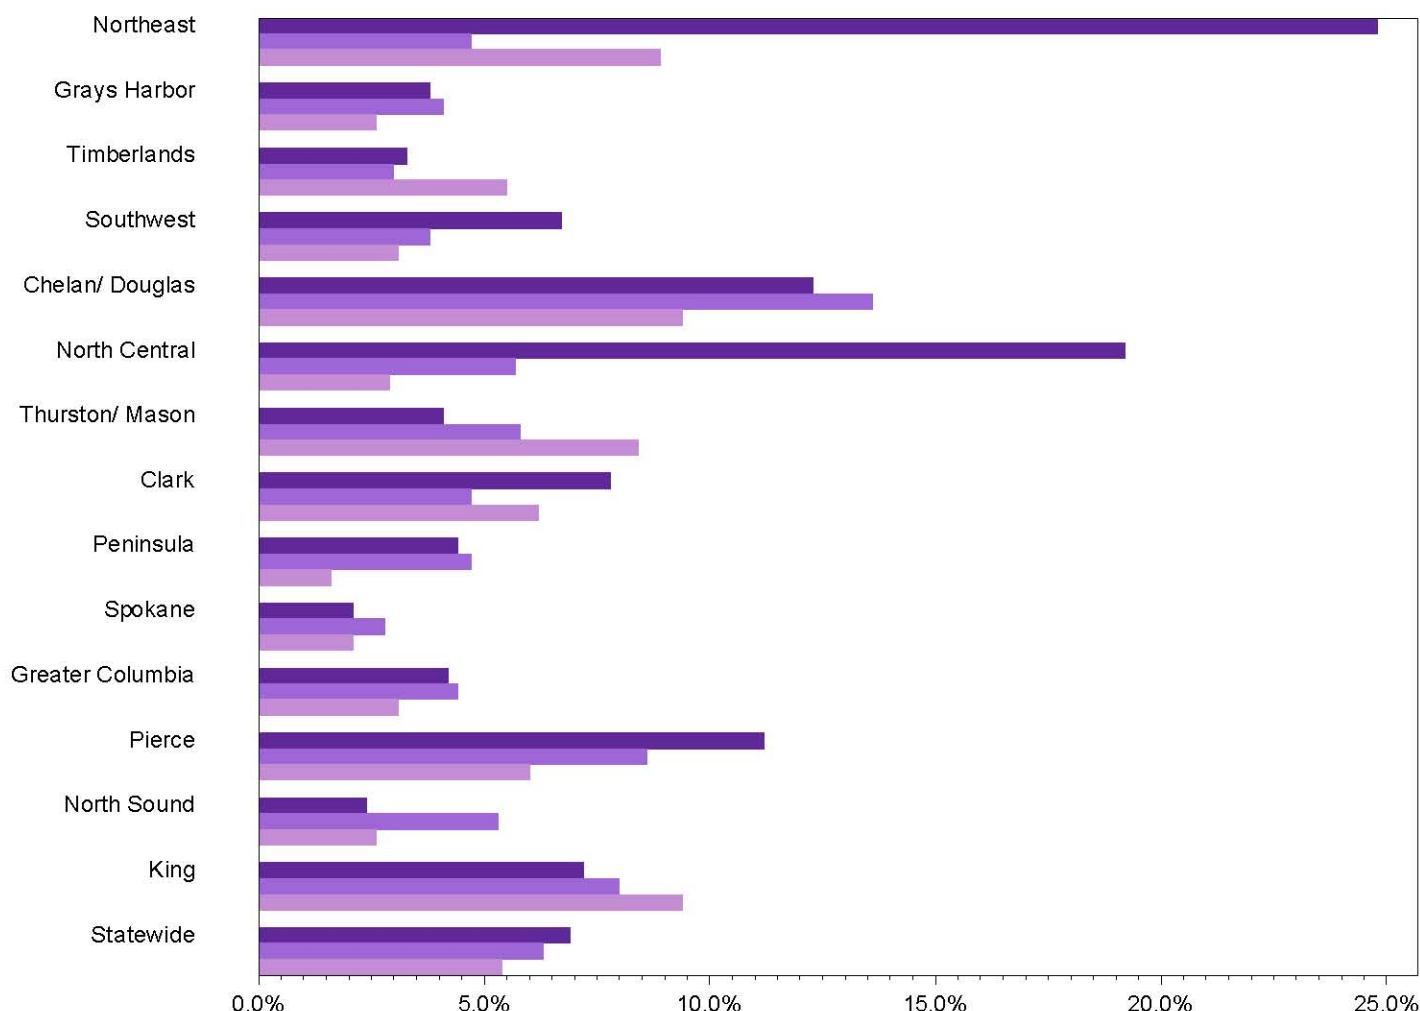

Discussion: This indicator shows the percentage of non-Medicaid children/youth who received outpatient services in their home, at school, and in other settings outside the mental health provider agency. The percentage of non-Medicaid children/youth served in their homes and school has decreased over the 3 years, while the percentage of non-Medicaid children/youth served outside the mental health provider agency has increased over the 3 years.

Data Notes:

- For penetration rates, a client is counted in the Medicaid served population if they were Medicaid enrolled and received a service at any point during that Fiscal Year. If a client falls on and off of Medicaid eligibility within the same Fiscal Year, they were counted in both the Medicaid and non-Medicaid served populations. Adding the Medicaid and non-Medicaid clients served produces a duplicated count of clients served.
- For the calculation of utilization rates, a service is considered Medicaid funded if the client was Medicaid enrolled at the time the service was delivered. A service is considered non-Medicaid if the client was not enrolled in Medicaid at the time the service was delivered.
- Medicaid enrolled counts are taken from the Mental Health Division (MHD) Ad-Hoc reporting system.
- No changes in data notes and data notes are already included because the indicators are not generated by LGAN and we don't have new data for this year's report.
- A child/youth could receive services in more than one of these settings in a year; therefore, the count across categories are duplicated.
- Age is calculated as of January 1st for each Fiscal Year.
- "Healthcare Service Location" in the January 1, 2002 MHD Data Dictionary is used to define service location. Home = 12, School = 19 & 80, Outside Mental Health Provider Agency = 21, 22, 23, 51, 52, 56, 99, 31-34, 61, 50, 71, 72, 54, 55.
- Multiple Healthcare Service Location codes were grouped into Outside Mental Health Provider Agency because the number of people served in each individual location is too small to report on separately.
- RSN counts show the number of unduplicated clients within each RSN (i.e. a person is counted once in each RSN where they receive services).
- The State total is unduplicated across all RSNs (i.e. each person is only counted once in the Statewide total even though they can be counted in more than one RSN).
